Areas of particular interest in this release

Printing of badges in Visitor.

High level feature list

Feature	Notes

Major changes to existing workflows

Workflow	Change
Bookings tab filter	<p>Filtering combinations in relation to empty and deleted meetings have changed to better reflect what is searched for. The two filters are implemented with an OR operator, meaning that turning on any of these two filters adds to the shown number of records.</p> <p>Both filters off: Only shows non-deleted meetings with bookings on them.</p> <p>Deleted meetings filter on: In addition to what is shown when both filters were off, deleted meetings are also shown.</p> <p>Empty meetings filter on: In addition to what is shown when both filters were off, non-deleted meetings without any bookings are also shown.</p>

Jira Issues Completed

T	Key	Release Description
	TEC-251	Changed filtering functionality in bookings tab.
	WF-228	Added highlighting to orphaned bookings.
	WF-224	Fixed an issue where bookings would appear as 'dangling', even if no discrepancy between between meeting date and delivery date.
	TEC-252	Fixed bug preventing email notifications from being sent.
	TEC-250	Fixed bug preventing user groups from editing resource filters.
